SEMINAR TOPIC

Construction of an Exercise, Step by Step

My training philosophy is to teach through motivational achievements so that the dog ultimately understands how to SUCCEED! In this seminar I will demonstrate how to look at a skill or behavior and break it down into its basic parts, then show how to teach each part individually. As each little step is learned, one by one, step by step, they are gradually put together to construct the entire skill and exercise. It is a training approach that allows the dog to fully understand how to succeed while also providing the trainer the ability to isolate any problem that might surface in the future with directness and clarity.

One of the goals of the seminar will be to show trainers how to develop their own techniques based on this learning approach, and to subsequently be able to recognize and isolate where any problems are originating so that the problem can be solved with little confusion for the dog.

This will be a comprehensive 2-day event which will be foundation skills to include the exercises in all classes, Novice, Open, & Utility.

Time will be provided for specific training questions and demos.

REGISTRATION OPENS 2/1/18. FORMS RECIVED BEFORE THEN WILL NOT BE ACCEPTED.
